Outlook

It's the holiday season. Prices are high with occasional dips. One stock we own was 8% off its high last week and we bought a bit more. Asia is a good story but no investment is worth overpaying for. So we'll remain patient.

James Hay
August 7th 2017

We don't like to discuss stocks publicly but I am always happy to talk to existing investors and those interested in investing. The Pangolin Asia Fund is most suitable for investors who are happiest when markets are falling.
